

MACE

Consulting

MACE provides specialist support and solutions for
Asset Management and Maintenance Engineering.

Operating for more than 25 years, **MACE** provides specialist Asset Management and Maintenance Engineering solutions and services across a broad industry base. **MACE** provides assistance to solve or manage complex business problems in an innovative, practical and efficient manner.

- Asset Management Strategy and Maintenance Engineering Solutions are our strengths at **MACE**.

MACE promotes maintenance engineering and asset management best appropriate practice, through the application of proven systems and processes. **MACE** is focused on outcomes and we will stand behind all of our recommendations.

MACE brings together specialist resources to analyse and improve the efficiency, reliability and whole of life cost of your entire asset management and maintenance engineering function.

Linking to Australian and International professional asset management bodies means **MACE** is in an extremely good position to add value to our client endeavours.

MACE utilises a range of strategies, reviews, information systems, benchmarks and evaluations so clients can take full control of their asset management activities.

Training, improvement programs, mentoring and coaching of asset managers, maintenance performance indicators and audits enhance the package. Detailed and meticulous planning supports the implementation.

MACE considers an outcome to be successful when knowledge and skills transfer to the client; the client has a sense of ownership of the outcome and implementation occurs.
